 - a. South African chart of accounts, basic financial reports
 - b. VAT setups
 - c. Drill down from account to source document – you will never be lost.
 - d. Basic user and role security setup
2. **40 hours** of implementation consulting services, which include:
 - a. Project planning and change management meeting
 - b. On-site Installation of Compiere server & Installation of Database
 - c. Chart of Accounts
 - d. Training to cover:
 - i. TWO day introductory workshops.
 - ii. Related Compiere help manual (1000 + pages).
 - e. Minor changes to support business processes
 - f. However, EXCLUDING : Data conversion from legacy system software : debtors, creditors, inventory and opening balances brought forward, General ledger opening balances import.
 - g. PLEASE NOTE: The complexity of this project scope ultimately depends on complexity of business process requirement.
3. **EXCLUDING – Separately Licensed:**
 - a. Compiere License fees. These are based on a per user per annum basis.
 - b. Database License fees : Oracle Standard Edition (www.oracle.com) or the open source EnterpriseDB (www.EnterpriseDB.com) licence fees.
 - c. Infrastructure and Network changes affected.

ON-SITE System requirements:

The system assumes the client has existing hardware and network infrastructure, user PC's and email facilities. An 512K ADSL as minimum is also recommended for effective off-site support.

Hardware Server:

1. Pentium 4 or AMD Equivalent on Linux server edition (Windows also ok).
2. Min 4 GB memory
3. Min of 100 GB hard disk space (Mirroring setup for redundancy recommended)
4. Machine must be dedicated for Compiere, Java and database. Backup policy to client standard.

Desktop Clients

1. Operating systems supported: Linux, Win 98, 2000, XP, Vista.
2. 512 MB memory is the only requirement depending on user specification.
Note: Power users – Min 1-2 GB ram recommended.

ON-DEMAND [HOSTED] System requirements:

Simply contact us at [info @ astidian.com](mailto:info@astidian.com)

Project pre-requisites:

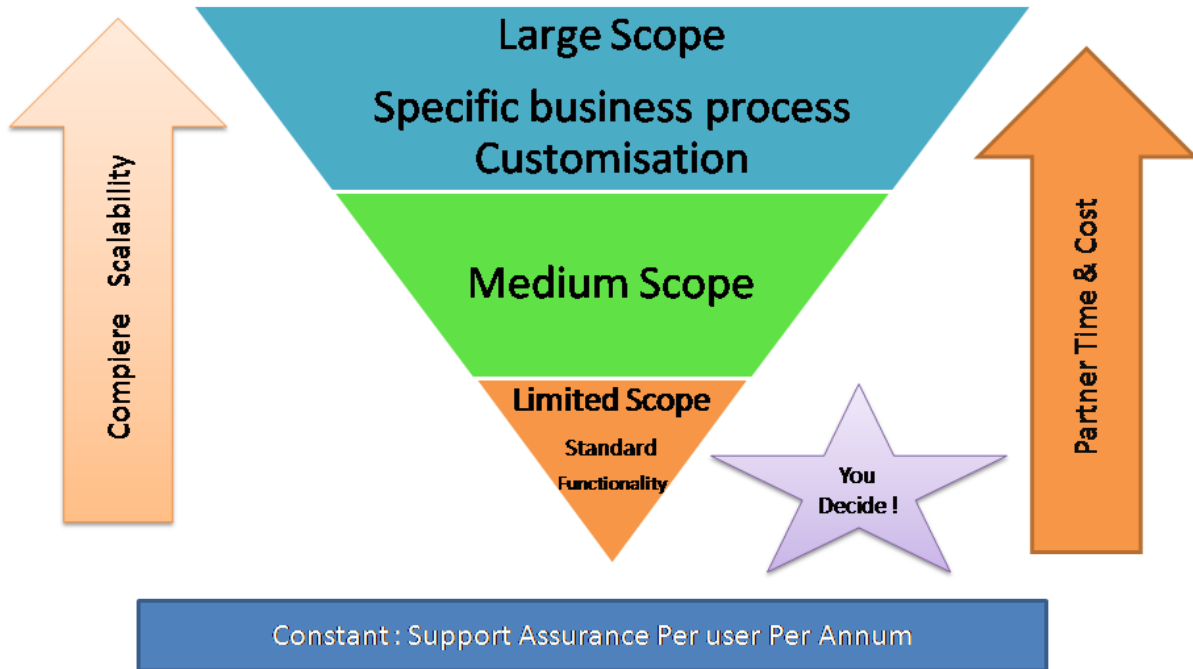

1. The Client shall provide Astidian applicable off-site communication facilities at no charge.
2. Based on Astidian SLA & Standard Terms and Conditions.

Price Guarantee

Compiere is guaranteed to be up to 30%-50% off any competitive package proposal licensing. We guarantee that if this system is not to your basic requirements as specified all fees payable will be paid back and an additional 10% of the proposal fee will be donated to a charity of your choice.

Implementation Discussion.....

Astidian Unique Proof Of Concept (POC) approach

- Astidian has a tried and tested "Proof of concept" approach for larger scope projects :
 - Prove certain deliverable / risk factors
 - Good understanding of the business
 - Not a major financial investment if decide not to implement the software
 - No upfront software costs
 - See your data work in the new environment
 - Demonstrate the rules of the new environment

POC deliverables

- Define the Requirements
- Determine the data sources.
- Test and Clean the data.
- Setup Client & Complete POC Template
- Compile Tables, Queries and Report Templates
- Ultimately turn "Proof of Concept" into Production Platform.

You wouldn't buy an expensive car without a Test Drive ?
